Description

This machine was specially designed for different market sectors that handle medium/large volumes of cash and need a bill and coin recycling system.

Conceived to reduce the costs involved in cash management quickly and expeditiously, and with maximum security, complying with the varying security regulations in place in different European countries.

We have thought of everything. Certified by the ECB, this is an ATM with a Bill and Coin Recycling System.

It is equipped with 4 recycle compartments, an accepted cash compartment, 8 hoppers for recycling coins and a cheque and document scanner.

Fully optimised

- More compact 750 x 750 mm (width/length).
- Cheaper, 30-40% less than our competitors.
- More Complete, an ALL-IN-ONE compact device.
- More Versatile, its dynamic software can adapt to any kind of operation.
- Greater Security. Its Safe has the most advanced Security systems on the market.

CIT, conceived for customers who use the services of Cash in Transit service companies for loading and unloading cash, with a double key access system and compartments protected by security seals.

Intended for the following sectors: Financial Institutions, Casinos, Gambling Premises, Retailers, Public Transport, City Councils (payment of taxes), Self-Ticketing and many others.
