Description

It is a specially designed machine for different market sectors that manage medium / high volumes of cash and that need a bill and coin recycling system.

Designed to reduce the costs of tedious cash management in an agile, fast and maximum security manner, complying with the different security regulations required in the different countries of Europe where to apply.

€asyPay has 3 doors: 1 external and 2 internal.

The external one is for handling coins, restocking and repairing malfunctions.

The two internal ones are to protect deposit and dispensing stackers that are usually managed from CIT.

Your CIT Partner can manage the machine securely.
